

INSTRUCTIONS FOR LABELING MASTER/ANNUNCIATOR

1. Labeling software can be downloaded from www.eeiusa.com. Software is also available upon request.
2. We recommend using transparency film.
3. Turn system power off. Failure to do so will damage components.
4. Remove front panel from cabinet according to installation instructions.
5. Unplug "A" & "B" cables. Be sure they are marked and can be reinstalled in proper position.
6. Lay front panel on a flat surface with PCB side facing up.
7. Loosen (2) inside, red screws in frame corner bracket located at the opposite end of the speaker.
8. Remove frame end.
9. Remove the remaining frame by sliding to side.
10. Turn panel over with switches facing up.
11. If labeling for Audio/Visual system, remove screws for handset.
12. Lift overlay off panel and lay upside down on flat surface.
13. Cut labeling strips along solid line.
14. Position labeled strips left to right on back of overlay so room number can be seen through clear lens. Tape ends of strips with cellophane tape. Turn overlay over and check for proper positioning. Adjust as necessary. It is recommended that one strip be done at a time.
15. Place overlay back on panel and reinstall handset hanger if used.
16. Reinstall panel in frame, plug in "A" & "B" cables, secure frame to cabinet, and turn system power on.
